

JAM INJECTION MACHINE

SERIES AGZ / AGZ-D

SOFT FILLING
WITH EXACT DOSAGE

POWERFUL PUMP UNIT

The gear pump can be controlled stepless and speed-controlled. So every kind of filling mixture can be processed without any problems.

SMOOTHLY FILLING WITH DIFFERENT TYPES OF FILLINGS

The stainless steel hopper with 32 litre capacity can be replaced by another at any time. In this way the filling mixture can be changed very simple. Also viscously fillings can be used. The tough design of the pump is able to pump this without plugging.

INDIVIDUAL FILLING PROGRAMS

The filling process can be saved for different types of pastries with different parametres like quantity of filling. The quantity can be adjusted stepless. To do this just change the filling time in the display.

QUICK CLEANING

For cleaning purpose the single parts which has contact with the filling mixture can be disassembled and removed easily. No special tools are required.

MODELS AVAILABLE

- Type AGZ
- Single needle
- Type AGZ-D
- Double needle

STANDARD FEATURES

- Complete stainless steel construction
- one / two 10 mm needles
- one / two 32 litre stainless steel hopper for filling mixture

OPTIONAL FEATURES

at additional cost

- Needles sizes from 6 to 10 mm
- Additional containers for different mixtures
- 17 litre Lexan hopper
